Seasoned Software Developer with 16 years of software development experience including 2 ½ years as PriceFx Configuration Engineer writing the code to configure PriceFx to business requirements. Proven track record of delivering robust solutions in enterprise environments. A self-starter with a passionate approach to software and focus on producing high quality code while ensuring the team achieves their goals. Proven ability to effectively collaborate with both technical and non-technical stakeholders, bridging the gap between complex IT concepts and business needs.

## TECHNICAL SKILLS

PriceFx Configuration Engineering (All modules)  
Groovy  
Cloud-based architecture (AWS experience)  
SQL  
Web Frameworks (React, Angular)  
Web application development  
JavaScript  
Angular  
C# .NET  
Ruby / Rails  
Version Control (Git, SVN)  
CI/CD pipelines (experience with Jenkins and GitLab CI/CD, Github Actions)  
Containers (Docker, Kubernetes)  
Agile-Scrum methodologies  
Testing Methodologies (Unit tests, Integration, E2E, TDD)

## WORK EXPERIENCE

**PriceFx**  
Feb 2022-Present  
Senior Configuration Engineer

- Collaborate directly with clients to code and deploy customized workflow in the company's proprietary development platform.
- Evaluate and refactor existing code to enhance stability, reusability, and overall system performance within the pricing platform.
- Lead technical discussions with cross-functional teams to translate complex pricing strategies into actionable software solutions.
- Troubleshoot and resolve critical issues, ensuring continuous operation of client pricing systems.
- Mentor junior developers in best practices for application development and pricing logic implementation.

**Ascend Learning**  
Sept 2019-Feb 2022  
Senior .NET Developer

- Coded new features for a professional education platform using .NET framework.
- Implemented and optimized Gitlab CI/CD pipelines to streamline development processes and deployments.

- Worked directly with vendors as one team, to integrate custom solutions into the platform.
- Integrated third-party APIs and services to expand platform capabilities and enhance the overall learning experience.
- Troubleshooted and resolved complex technical issues, ensuring minimal downtime and maximum availability of the learning platform.

## **Fike**

Nov 2019-July 2020

Freelance Developer

- Spearheaded the migration of JDE Databases to Snowflake using brand new system designs
- Designed and developed innovative tools for sales forecasting, enhancing the accuracy and efficiency of the sales team's predictions.
- Architected AWS infrastructure pipelines from the ground up
- Created tailored applications to facilitate the database migration process

## **C.H. Robinson**

Nov 2018-Sept 2019

.NET Developer

- Developed new features using C# and Angular to support pricing and logistics operations teams, enhancing efficiency and decision-making capabilities.
- Implemented robust pricing algorithms and models, improving the accuracy and competitiveness of logistics pricing for the company.
- Collaborated with operations teams to understand business requirements and translate them into effective technical solutions.
- Implemented automated testing strategies using unit and integration tests, reducing bugs and improving overall system stability.

## **Alight Analytics**

Jan 2016-Nov 2018

Senior Developer

- Led the development team for a new marketing analytics platform - ChannelMix.
- Designed and implemented integrations with AWS services including Redshift, EC2, and ECS, enhancing the scalability and performance of analytics platforms.
- Orchestrated the implementation of Docker in production environments, streamlining deployment processes and improving application consistency across different environments.
- Mentored junior developers in best practices application development, fostering a culture of continuous learning and improvement.
- Developed robust analytics solutions using Angular, providing clients with powerful tools for marketing data analysis and visualization.
- Implemented and optimized CI/CD pipelines using Jenkins and AWS, reducing deployment times and increasing the frequency of successful releases.

## **FastIron**

Jan 2015-Jan 2016

#### **.NET / Angular Developer**

- Developed and maintained application using C#, .NET, JavaScript, and Angular.
- Implemented responsive design principles to ensure optimal user experience across various devices and platforms.

#### **Red Nova Labs**

Sept 2013-April 2014

Ruby Developer

- Built and optimized web applications using Ruby on Rails, enhancing product functionality.

#### **Intouch Solutions**

May 2011-Sept 2013

.NET Developer / Front-End Developer

- Developed pharmaceutical marketing websites using C# .NET, HTML, CSS, and JavaScript.

#### **U.S. District Court**

Sept 2009-May 2011

Software Developer

- Created and maintained web applications using PHP, HTML, and CSS to support court operations and improve workflow efficiency.

### **EDUCATION**

#### **Bachelor of Science in Finance**

University of Kansas - Lawrence, KS
